# JUST A SHORT TALK

Some of my friends tell me my catalogue is an old story; it's my business to make it an interesting story to you. Dwarfed Fruit Trees are my hobby and specialty. In imagination, I do not feel that I am selling merely trees, but rather the prospect of a real fruit garden.

## WE HAVE GROWN DWARFS FOR ONLY TWELVE YEARS

About twelve years ago I first realized what dwarf fruit trees were for the city gardener particularly: a wonderful chance to increase the pleasure, satisfaction and value of the home fruit garden which is usually somewhat limited for room. Standard size fruit trees take a great deal of room, and often give more fruit at one time than the family can use up. The dwarfs take much less room; more of them can be planted; a greater assortment of varieties can therefore be had, with a correspondingly longer season of fruit.

## OUR FAITH IN DWARFS HAS BEEN JUSTIFIED

They have met the requirements of thousands of homes. In accord with their popularity I have produced more and more of them each year, until I am now strongly specializing in dwarf trees. The last twelve years has proved them the ideal fruit trees for the home garden.

## YOU HAVE HELPED PROVE DWARFS A SUCCESS

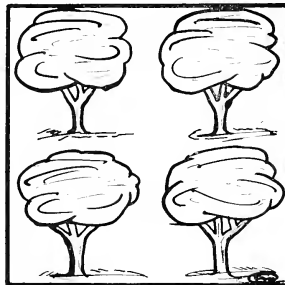

It is said, nothing succeeds like success. Dwarf fruit trees are in the same class. The ever increasing use of these trees is almost astonishing. You have probably helped prove them a success, as I have heard from most of those to whom this catalogue is sent. If we hear from you again this spring, it will be another busy season for us. If you are not interested in my trees this year, I am sure you will do your neighbor a favor by passing my catalogue on to him.

C. C. McKay

DWARFS?

## OUR GUARANTY—SUBSTITUTIONS

**Orders for the Orchard**—We guarantee our customers against wilful change of labels, and exercise the greatest care to have every variety true to name. It is to be understood between purchaser and ourselves that our liability shall not be greater than the amount of the purchase price. If out of varieties ordered, we shall omit such varieties and refund amount paid for them, unless the order indicated second choice of varieties.

**Orders for the Home Garden**—On these orders, when out of a variety, we substitute a variety as good, and as nearly as possible like the one ordered, unless you instruct us **not to substitute**.

## OUR GUARANTEE—REPLACEMENTS

We will **replace at half price** such trees as do not live, provided you report by **August 1st** following the fall or spring your order was shipped.

## MANNER OF SHIPPING

All shipments are f. o. b. express or freight office, Geneva, N. Y., where our responsibility ceases. All shipments are made by express except (1) orders large enough to require boxing, and (2) unless you positively order freight shipment. It is rarely practicable to ship full size trees by mail.

## TERMS

Our terms are **cash with order**. This is no reflection on the credit of our customers, but is necessary to handle our mail order business in the easiest possible way. Remit by postal, or express order, or your own personal check. We do not ship C. O. D.

VAN DUSEN NURSERIES, C. C. McKAY, Manager, GENEVA, N. Y.

Price Each		Below we indicate the color, size, quality, date when fruit becomes edible in Western New York and the number of weeks these varieties will keep in a cool dry cellar storage at Geneva after first becoming ready to eat. Pick late Fall and Winter apples while hard and allow to mellow up in storage.						
Standard	Dwarf	APPLES	Color	Size	Q'ty	Matures	Wks	Remarks
—	\$1.25	Alexander	Red Striped	Very Large	Good	Sept. 5-15	5	A hardy juicy apple, fine for cooking.
90c	1.25	BALDWIN	Bright Red	Large	Very Good	Dec. 1-15	14	Baldwin is a staple apple in every market. It is a bright red winter apple with firm crisp flesh, good flavor, and is an excellent keeper.
—	1.25	Ben Davis	Red Striped	Large	Fair to Good	Dec. 1-10	15	Does not equal Baldwin in quality, but is popular in the Ben Davis Belt, where it becomes large, handsomely colored, and acceptable in quality.
—	1.25	Champlain	Pale Yellow	Good Size	Very Good	Aug. 15-20	2	Very tender and juicy. Ripens in succession from August till October. Fine for home use.
—	1.25	Chenango	Light Red	Medium	Very Good	Sept. 1-10	3	Ripens in succession, so may be picked continuously for several weeks. Flesh is white, tender and juicy.
—	1.25	Constantine	Bright Red	Large	Good	Sept. 20-30	5	Another Russian variety, very hardy, juicy. Excels particularly as a cooking apple.
—	2.00	Deacon Jones	Red Striped	Large	Good	Dec. 1-12	12	Fruit showy, bears young. Exceedingly productive, an excellent cooking apple.
90c	1.50	DELICIOUS	Dark Red	Large	Best	Nov. 15-25	10	A characteristic shape of it's own, rather long and tapering, ribbed with very prominent knobs on the blossom end. The flesh is tender and juicy.
—	1.25	EARLY HARVEST	Pale Yellow	Medium	Very Good	Aug. 1-10	1	One of the earliest of the summer apples, and is excellent for both cooking and eating. Sprightly subacid flavor. Desirable for home use.
—	1.25	Early Ripe	Yellow	Medium	Good	Aug. 1-10	1	Crisp, tender and juicy. A fine culinary apple for early summer.
90c	1.25	Fameuse	Bright Red	Medium	Best	Oct. 5-15	8	One of the best eating apples. The flesh is white, tender and of fine flavor. Not used for cooking.
90c	1.25	Gravenstein	Red	Large	Very Good	Aug. 20-30	6	Attractive appearance, high quality, almost unexcelled in its season for cooking.
—	1.25	HENDRICK SWEET	Red	Medium	Very Good	Nov. 5-15	6	Also called Sweet Winesap. An attractive red winter apple of good size. It is equally excellent as an eating apple or for baking. Juicy, and distinctly sweet.

## Our Dwarf Apple Trees

Our list of dwarf apples is budded on doucin roots to produce the dwarf style of tree. Even under conditions of neglect these trees will rarely grow more than fifteen feet high. By a small amount of wise annual pruning they may easily be grown to ten or twelve feet high when mature.

The trees on doucin roots may be planted from ten or twelve feet to twenty feet apart, depending on the height it is intended to grow them.

We get some reports from customers of trees which fruit the first or second year after planting. Most any of them may be expected to begin bearing at least the third or fourth year. The difference is that some varieties naturally bear younger than others.

My dear Mr. McKay:

Trees came in good shape. Glad you had what we wanted, although last year's substituting was not at all unsatisfactory. We'd just like to mention, the little "Wolf River" apple is doing so finely! It is covered with blossoms and is a beauty! We like to tell people all the good things! With no frost now this little "creature" ought to be a wonder.

Very truly,  
C. R. D.

Dwarf Scarlet Beauty

Chena-go

Pleasantville, N. J.  
March 29, 1921.

Dear Sir:

Please send order by express. Enclosed please find check for amount.

The fall of 1914 I bought four dwarf apple trees from you. These are all doing fine. Last year (1920), from one tree, a Stayman Winesap, I picked five half bushel baskets of No. 1 apples, all picked while standing on the ground.

Very truly yours,  
C. L. L.

Fameuse

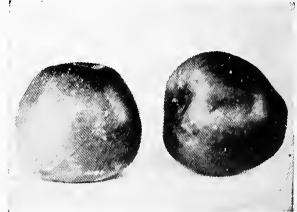

Price Each		When sold out of a variety ordered, our policy is to substitute another labeled true to name, of similar color, quality and season, unless you instruct us otherwise. Remember to write "Do not substitute" on your order if such is your wish and we will refund the money instead of substituting.							
Standard	Dwarf	APPLES	Color	Size	Q'ty	Matures	Wks	Remarks	
—	\$1.25	KING	Bright Red	Large	Very Good	Nov. 15-25	9	The uniformly large size of King and it's beautiful red color make it one of the fancy market apples. It has exceedingly high quality, and is adapted to either eating or cooking uses.	
—	2.00	Lady	Red	Small	Best	Dec. 5-15	13	A strikingly beautiful apple, highly desirable for decorative use and for dessert.	
—	1.25	Lady Sweet	Striped Red	Large	Very Good	Nov. 15-25	7	An exceedingly fine sweet apple for home use. Fine red color and excellent quality.	
90c	1.25	McINTOSH	Bright Red	Large	Best	Oct. 15-25	9	I believe this is one of the highest quality apples grown. It is a little more crisp and tender, and has a rather finer flavor than any apple I know. The flesh is white, very juicy, and distinctly perfumed.	
—	1.50	Mother	Bright Red	Medium	Best	Nov. 15-25	8	A beautiful red apple of good size, with tender, rich, aromatic flesh of best dessert quality.	
90c	—	Northern Spy	Bright Red	Large	Best	Dec. 5-15	14	Very superior in flavor and quality. Attractively striped with bright red. The flesh is very crisp, tender and juicy. Excels both for eating and cooking.	
—	1.25	Oldenburg (Duchess)	Striped Red	Medium	Good	Aug. 1-10	2	A very hardy Russian variety, valued for its high cooking qualities.	
—	1.25	Opalescent	Deep Red	Large	Very Good	Oct. 15-25	9	Large, shapely, nearly covered with brilliant red. Takes a brilliant glossy polish. Flavor mild subacid of good quality.	
90c	1.25	Red Astrachan	Striped Red	Medium	Very Good	Aug. 10-30	3	A very beautiful summer apple. Used for cooking till fully ripe, when it is fine for eating.	
—	1.25	Red Bietigheimer	Light Red	Very Large	Fair	Sept. 10-20		A good cooking apple, but poor to eat. Remarkable only for it's great size and beauty.	
—	1.25	Red Canada	Deep Red	Medium	Very Good	Nov. 1-10	9	Very attractive bright deep red, desirable size, superior quality. A fine dessert apple.	
90c	1.25	R. I. GREENING	Yellow Green	Large	Very Good	Nov. 20-30	12	A favorite throughout New York which is unsurpassed as a cooking apple and ranks high for dessert use. It is very tender, extremely juicy, with a delicate, rich fine flavor.

		APPLES	Color	Size	Q'ty	Matures	Wks	Remarks
90c	\$1.50	SCARLET BEAUTY	Dark Red	Very Large	Good	Oct. 1-15	4	But once in a life time does a nurseryman secure such a prize as <b>The Big Red Apple</b> . Distinctly large without being coarse, of a vivid, brilliant, all-over red—as handsome as McIntosh and much larger.
90c	1.25	Spitzenburg	Bright Red	Large	Best	Nov. 15-25	13	A choice apple for dessert or culinary use, almost unexcelled in flavor and quality.
90c	1.25	Stayman Winesap	Red Striped	Medium	Very Good	Dec. 15-25	13	Very juicy and good quality for either home use or market.
—	\$1.50	STEARNS	Striped Red	Large	Very Good	Oct. 5-15	4	We are fruiting this choice variety, and prize it more each year. It is beautifully striped with pink and carmine. The flesh is slightly acid, tender, juicy and chuck full of delicious flavor.
—	1.25	SWEET BOUGH	Pale Yellow	Large	Very Good	Aug. 5-25	3	One of the finest summer apples, having all the good qualities which make it a favorite in the home orchard. Very tender, juicy and sweet.
—	1.25	WEALTHY	Bright Red	Medium	Very Good	Sept. 10-20	5	Very hardy in cold climates and valuable both for eating fresh and for cooking. Trees bear young. Flesh is crisp, tender and very juicy.
—	1.25	Winter Banana	Yellow Blushed	Large	Very Good	Nov. 15-25	9	Beautiful pinkish-red blush similar to the Maiden Blush apple. Fine dessert quality.
—	1.25	Wolf River	Red Striped	Very Large	Good	Sept. 5-15	5	Very hardy, fruit highly colored and attractive. Best as a cooking variety.
90c	1.25	Yellow Transparent	Yellow	Medium	Very Good	July 10-30	2	One of the best extra early apples. Flesh is white, tender, juicy and very pleasant in flavor.

Orders for standard apples will be filled in the order in which they are received, as long as our stock lasts. If we are unable to supply stock, our liability will be limited to the refund of price paid.

We periodically renew our buds of all the fruits from bearing trees, to eliminate as much as possible the chance of mixture of varieties. We exercise the greatest care to have every tree true to name and in healthy condition, and it is understood between the purchaser and ourselves that we are not liable for more than the purchase price of trees that prove untrue.

Price Each		Below we indicate the size, quality, date when fruit becomes ripe to eat in Western New York, and number of weeks these varieties will keep in cool dry cellar storage at Geneva after ripening. These are not picking dates. Most pears should be picked while hard and ripened in the cellar.					
Standard	Dwarf	PEARS	Size	Quality	Matures	Wks	Description
—	\$1.00	Anjou	Large	Very Good	Oct.	8	Greenish yellow, faintly blushed, fine vinous flavor, one of the best keepers.
—	1.00	Bar-Seckel	Medium	Very Good	Oct. 1-10		Yellow, with red cheek; fine flavor. A cross of Bartlett and Seckel.
\$1.25	1.00	<b>BARTLETT</b>	Large	Good	Sept. 5-15	2	Probably the leading American pear. The flesh is buttery, very juicy, rich and highly flavored. An extremely valuable market variety and one of the most satisfactory for canning or eating fresh.
1.50	—	<b>Bosc</b>	Large	Best	Oct. 20-30	2	Dark mottled yellow, often with some cinnamon russet. Very rich and sweet. A choice home variety, and brings top prices in the market.
—	1.00	<b>CLAPP</b>	Very Large	Very Good	Aug. 20-30	2	As good as Bartlett, though not so widely known. Somewhat richer flavor; too tender to use for canning. A very profitable market pear and among the best for home use.
—	1.00	Comet	Medium	Fair	Aug. 15-20	1	Yellow with vivid pinkish blush. Largely desirable for its very early season.
1.50	1.50	<b>Comice</b> (1 year only)	Large	Best	Oct. 15-30	3	Lemon yellow, greenish tinge, flecked with brown russet. Tender, sweet and rich, with delightful flavor.
—	1.00	Dr. Reeder	Rather Small	Good	Oct. 15-20		Dull green or yellow, with slight brown blush. Very juicy and sweet. Trees bear young.
—	1.00	<b>DUCHESS</b>	Very Large	Good	Oct. 15-25	3	When fully ripe, Duchess is a bright yellow color, generally blushed on one side. Dwarfing seems to improve the fruit of this variety, which is prized for cooking as well as for eating fresh.
—	1.00	Idaho	Large	Very Good	Sept.		Golden color with russet spots. Juicy and of wonderfully pleasing flavor.
1.25	1.00	Kieffer	Medium	Fair	Oct. 20-30	3	The flesh is crisp, juicy of slightly quince flavor; generally only fair eaten fresh; but exceedingly valuable to cook, which brings out it's fine spicy flavor.
—	1.00	Osband Summer	Rather Small	Good	Aug. 10-15	1	Clear yellow, generally with red cheek. Flesh melting, sweet and perfumed.
1.25	1.00	<b>SECKEL</b>	Small	Best	Oct. 1-10	3	One of the richest and finest varieties we have. A valuable commercial pear, and should be included in all home plantings. The color is yellow brown with russet-red cheek. Very juicy with rich spicy flavor.
1.25	—	Sheldon	Medium	Very Good	Oct. 1-10	4	Somewhat apple shaped, yellowish russet; juicy and sweet; one of the fine late pears.
—	1.00	Vermont Beauty	Medium	Good	Oct. 5-15	3	A beautiful pear, yellow shaded with carmine. Very productive and hardy. The flesh is melting, sweet and juicy.

### McKay's Dwarf Pears Produce the Fruit

Our pears are dwarfed by budding them on quince roots. These are much slower growing than pear roots, hence the resulting tree is restricted to the dwarf style of growth. In America pears have been used as dwarfs more than any of the other fruits, though dwarfed trees of the other fruits are now becoming more widely appreciated, and are equally popular and successful where they are well known.

Dwarfed pear trees may be planted from ten to fourteen feet apart, depending on the size tree the planter intends to secure. They may grow to twelve or even fifteen feet in height, depending on the variety, but can be easily grown to eight or ten feet high when mature by practicing more severe dormant prunings. Dwarfing improves the pear in quality even more than the other fruits. They are the best of the fruits to grow in the pyramid shape, and succeed well trained in the cordon and espalier forms.

All pears require heavy strong soil, clay loam or even strong clay giving far better results than light soils. The standard pears furthermore need dry soil, but as the dwarfs are budded on quince roots they may thrive either on dry or wet ground.

Planted Four Years

You want the results which Dwarf Trees give. These little trees are more sure and quicker bearers than any others.

**\$1**

The Cost

The Start

Planted 3 yrs.

Same Tree Planted 7 yrs.

## QUINCE BUSHES

The quince fruits very young. The blossoms come out from the tips of the first young shoots that start growing in the spring. They should not be trimmed, except to remove dead branches.

### Two Year Old Bushes \$1.25 each

**Bourgeat**—A stronger grower even than Champion and shows the same tendency to produce fruit right in the nursery row. A late keeper.

**Champion**—A very vigorous grower, and bears young. Fruit very large, lively yellow color, cooks very tender.

**Orange**—Large, round, golden fruit, valuable for preserves and flavoring. A weaker grower than the last two, but the best for commercial planting.

**Pineapple**—Flavor suggestive of the pineapple. Makes a superior jelly, or may be eaten raw.

### The Following, One Year Whips only, \$1.10 each

**Bentley**—Medium size, particularly attractive, a good grower and producer.

**Smyrna**—Clear yellow color; of peculiar shape; a fine quince with a flavor of it's own.

**Sweet Winter**—Medium sized, pear-shaped, beautiful fruit. Quite late, rather sweet, a little gem for the home garden.

Mr. C. C. McKay:  
Geneva, N. Y.

My dear sir:

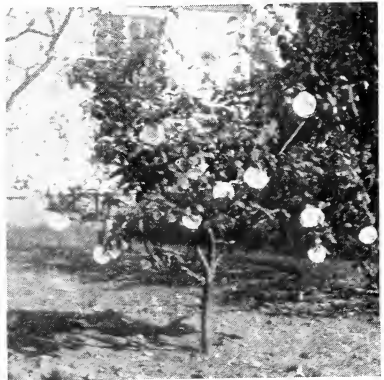

My Champion Quince did very well this year. It is four years old, 46 inches high, and set 32 fruit. I thinned out 20 so as to leave 12 to mature; of these, one was 14 oz., 3 were 13 oz., 3 were 12 oz. and the others were good sized and smooth, and this in a section of the country that does not usually produce such fruit in good form. Am sending you a photo of the tree.

Very truly,

Dr. E. R. L.

Westerly, R. I.  
Oct. 26, 1921.

This letter describes the Quince Tree shown below.

Champion

Orange

Smyrna

Price Each		The season of European plums at Geneva lasts from about July 15th to about Oct. 5th. The season of those plums listed here will therefore, as indicated below, last from the middle of August to early October. We have as standards only those as offered by the indication of price.				
Standard	Dwarf	EUROPEAN PLUMS	Color	Quality	Season	Remarks
—	\$1.50	Agen	Violet Purple	Best	Late	Unusually productive. One of our best plums, whether fresh, cooked or dried.
\$1.50	1.25	Bradshaw	Reddish Purple	Good	Mid-Season	Attractive, very large, very productive; Not the most highly flavored plum, but very juicy and sweet.
1.50	1.25	Fellemburg	Purplish Black	Best	Late	Also called Italian Prune. Very large, slightly tart, finely flavored.
—	1.25	French Damson	Dull Black	Good	Late	Sweet and juicy; the largest of the Damson plums.
1.50	1.25	German Prune	Purplish Black	Very Good	Late	Excellent for all culinary purposes, especially canning. Long fruiting season.
—	1.25	Huling's Superb	Greenish Yellow	Very Good	Mid-Season	One of the largest of the Reine Claude group of plums.
—	1.50	Imperial Epineuse	Purplish Red	Very Good	Rather Late	Almost unsurpassed in quality by any other plum of it's color.
—	1.25	King Damson	Black	Good	Late	One of the larger Damsons. When fully ripened it becomes a very good dessert fruit.
1.50	1.25	Lombard	Purplish Red	Fair	Mid-Season	Popular and largely planted. Quality only fair to eat, but excellent cooked or spiced.
—	1.25	Miller Superb	Mottled Yellow	Very Good	Mid-Season	One of the finest for dessert of the Reine Claude type of plums.
—	1.25	Palatine	Greenish Yellow	Very Good	Mid-Season	Another of the Reine Claude group; juicy, sweet and pleasant in flavor.
—	1.25	Pearl	Golden Yellow	Best	Mid-Season	Somewhat unproductive; almost unsurpassed quality, with sweet luscious flavor.
1.50	1.25	REINE CLAUDE	Yellowish Green	Very Good	Late	Very few plums excel Reine Claude in the qualities most desired—richness of flavor, consistency and texture of flesh, abundance of juice and pleasant aroma. The trees are very productive and bear regularly. It is also one of the most profitable commercial plums; in fact on the Van Dusen Farm it is the most profitable fruit sold from our plum orchards.
—	1.25	Shropshire Damson	Purplish Black	Good	Late	Not a dessert variety, but one of the fine Damsons for jam and jelly. When fully ripe, or after a frost, may be eaten out of hand.
—	1.25	Sultan	Deep Red	Good	Rather Early	The fruit is firm, juicy and pleasantly flavored, and is also a good culinary plum. Rather large and very productive.
1.50	1.25	Yellow Egg	Golden Yellow	Good	Late	Probably the largest and handsomest yellow plum. The flesh is rather juicy, firm, of average sweetness, mild in flavor.
JAPAN PLUMS						
1.50	1.25	ABUNDANCE	Mottled Red	Good	Early	Abundance bears heavily each year, and succeeds over a wide range of soil and climate. The fruit of this variety should be picked before quite ripe, and ripened off the tree to develop its best flavor. Colored with varying shades of pink and red. The flesh is tender, juicy and sweet.
—	1.50	Apple	Dull Red	Good	Mid-Season	Dark red flesh and long keeping quality. A conspicuous plum in shape, size, color and flavor.
—	1.25	Bartlett	Purplish Red	Good	Very Early	Fruit attractive, and one of the very earliest to ripen. Peculiar but pleasant taste, similar to Bartlett pear in flavor.
1.50	1.25	BURBANK	Dark Red	Good	Rather Early	Some growers claim Burbank the best of the Japan plums. Its quality is possibly even better than Abundance; to offset this, it does not bear quite so heavily. It ripens a week after Abundance and is a good variety to plant with it. The flesh is rather firm, juicy and sweet.
—	1.50	Chabot	Light Red	Good	Mid-Season	Large, beautifully shaped and handsomely mottled in shades of red over yellow. The beauty of the Japan plums.
—	1.25	October Purple	Dark Red	Good	Rather Late	Attractive in appearance and very large; a very good late plum, and a good keeper.
1.50	1.25	Red June	Garnet Red	Fair	Early	Though not of high quality, Red June is valuable for it's early season. Usually ripens about a week before Abundance.
1.50	1.25	Wickson	Dark Red	Good	Rather Early	Remarkable for it's great size, handsome coloring, distinct shape, firm flesh and peculiar flavor, which most people consider pleasant. At it's very best in the Southern and Pacific Coast states. Can not be grown where peaches are not hardy.

Branch from our test tree of Sultan

## NATIVE AMERICAN PLUMS

\$1.50 each

**America**—Clear currant red, mild flavor, enormously productive.**Clifford**—Large, pear shape, bright scarlet, sweet, good, cling.**Forrest Garden**—Dark red, bears young, hardy, spicy flavor.**Milton**—Ripens very early, large, dark red, good quality, cling.**Poole Pride**—Clear red, peculiar flavor, long fruiting season.**Wonder**—A medium size red native plum secured from Texas.

Dwarf Abundance in Bloom

## DWARF PLUM TREES

Dwarfed on slower growing roots than our standard plums, the dwarfs may be planted ten or twelve feet apart, some planters claiming to get good results planted even a little closer than this when they are well managed by giving strong dormant prunings.

Dwarf Poole Fruiting

The best known class of garden plums, the Europeans, are so called because introduced from Europe in early Colonial days. They are characterized by solid meaty flesh and free stone pits. The season of European varieties at Geneva lasts from about July 15th to about October 5th.

The Japan plums differ widely from the Europeans. As a class they have a distinctive flavor. They are almost as hardy as European plums, thrive over a wide range of territory and are particularly valuable in the Southern states where the others fail. They make fine dwarfs, Burbank and Abundance being among the best. At Geneva their season lasts from about July 20th to about September 20th.

Perhaps the finest of plum flavors are found among varieties of the native American plums. They vary much in size and flavor and are among the hardiest of our plums. With us at Geneva they are mostly in season between August 20th and September 30th.

Miller Superb

Reine Claude

Burbank

It is difficult to photograph a plum tree to show the fruit well. The plums are small, dark, and are lost among the leaves. Last August the writer picked a market basket nearly full from the tree above. It stands six feet high and has been planted five years.

Price Each		Below are given the characteristic, color, size and quality of the varieties we offer. The ripening dates given are those to be expected at Geneva, or other localities with similar seasons, in a normal year. This list includes the choicest varieties.					
Standard	Dwarf	PEACHES	Flesh	Size	Quality	Ripens	Remarks
60c	\$1.25	Belle of Georgia	White	Large	Good	Sept. 10	Attains greatest perfection in Southern climate; is found valuable for home use in New York.
—	1.25	Brandywine	Yellow	Large	Good	Sept. 25	Flavor mild but not rich, flesh juicy and tender.
60c	1.25	Carman	White	Medium	Very Good	Aug. 15	One of the best early peaches. Adapted to a particularly wide range of soil and climate.
60c	1.25	Champion	White	Medium	Best	Aug. 25	Probably the best white-fleshed peach! But, it excels only in the best peach soils.
60c	1.25	Crawford Early	Deep Yellow	Large	Best	Sept. 1	Great beauty, rich flavor and high quality. Somewhat capricious to soil and climate.
60c	1.25	Crawford Late	Yellow	Very Large	Best	Sept. 15	Has all the good qualities of Crawford Early, and thrives in a wide range of soil and climate.
—	1.25	Crosby	Deep Yellow	Medium	Very Good	Sept. 20	Requires the best peach soil. The rich flesh is delicious to the taste either fresh or cooked.
60c	1.25	<b>Elberta</b>	Yellow	Very Large	Good	Sept. 15	Thrives in wide range of soil and climate; large, handsome and very productive. <b>Best when ripened on the tree.</b>
—	1.25	Eureka	White	Large	Good	Sept. 20	Flesh tender and melting, very juicy, pleasantly flavored. Desirable South as well as North.
60c	1.25	Fitzgerald	Yellow	Large	Best	Aug. 28	Almost identical with Early Crawford except for it's season and the fact that it is more productive.
—	1.25	Frances	Yellow	Large	Good	Sept. 25	Has a rich vinous flavor. A fine sort for the home garden.
—	1.25	<b>GREENS-BORO</b>	White	Large	Fair	July 30	One of the leading early white-fleshed peaches. Probably no other white peach is adapted to a greater variety of soils. Fruit showy and large. Trees very fruitful. Earliest to ripen.
60c	1.25	Hiley	White	Large	Very Good	Aug. 15	Trees productive; large handsome fruit; flesh tender and of very pleasant flavor.
—	1.50	<b>JAPAN DREAM</b>	<b>DEEP RICH RED</b>	Medium	Very Good	Aug. 5	No other peach I know bears so quickly or so heavily. Seems to be adapted to all peach sections. Ripens early when good peaches are scarce. The fruit is a beautiful red and is fine in flavor.
—	1.25	Lamont	Light Yellow	Very Large	Good	Sept. 25	Similar to Early Crawford, more productive, a fine home variety.
—	1.25	Mamie Ross	White	Large	Good	Sept. 10	A very handsome table peach of good quality and pleasant flavor. A favorite in the South where it originated.
—	1.25	McKay Late	Yellow	Large	Good	Oct. 15	An extremely late peach originating on our farm. Remarkably good and juicy for it's late season.
—	1.25	Miss Lola	White	Large	Very Good	Aug. 15	One of the great white-fleshed peaches. Hardy, productive, delicious in flavor.
60c	1.25	New Hale (JHH)	Yellow	Very Large	Good	Sept. 10	Budded from trees secured from the originator.
—	1.25	<b>Pallas</b>	White	Medium	Very Good	Sept. 10	About the best of the honey-flavored beaked peaches tried in this locality, and is hardy at Geneva. It is rich, sweet and aromatic—superbly delicious to those who like sweets.
60c	1.50	Rochester	Yellow	Large	Very Good	Aug. 20	A strikingly beautiful member of the Crawford group. The flesh is firm, rich, juicy and sweet.
—	1.25	Stump	White	Large	Very Good	Sept. 15	A long time favorite late white peach. Not particularly handsome, but approaches the best in quality.

### Standard Peach Trees for Commercial Orchards

In standard peach trees we have some choice stock, which you may count on being healthy, vigorous and well rooted. In peaches particularly, the best stock pays best. We are able to offer these at a reduction from prices of the last few years. In lots of fifty trees or more we offer these at the rate of **\$40.00 per hundred**. We invite correspondence.

## DWARFS FOR QUICK FRUITING

Gentlemen:

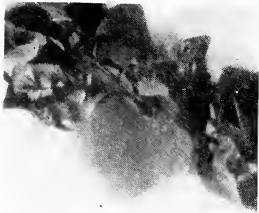

The dwarf Japan Dream peach you sold me in 1918 had 32 peaches last year, 75 this year—and the dwarf Champion has 44 peaches this year.

Yours very truly,  
Mrs. F. W. G.

Long Island,  
Aug. 22, 1921.

### Dwarf Peach Trees

Dwarf peaches seem to speak for themselves. Scarcely an order comes without including at least a tree of this fruit. Had it not chanced that to most of mankind the peach is free for the growing of it, we would surely prize it as a luxury. It is the one of our Northern fruits which is tropical in it's lusciousness.

Early Crawford

delight in "Peach Season." In the little garden planted for the family and for "Dad" to putter in, he wants a sequence of varieties chosen for quality and if he wishes can secure each summer two solid months of "Peaches almost every day."

In dwarfing our peaches we use roots which after considerable experience seem best for the purpose. These trees grow so rapidly for a year or two that they might almost be mistaken for standards instead of dwarfs, but after the second or third year the dwarf characteristics become unmistakably evident.

Plant the trees eight or ten feet apart. Don't forget to give them a good stiff pruning each spring and grow them six or eight feet high at most. A row of these little trees at the side of the garden are a true

Dwarf, Early Crawford—Planted 1920

### DWARF APRICOT TREES

\$1.25 each

**Black Apricot.** A large, handsome apricot of very dark color. One of the hardiest kinds. Ripens the third week of August.

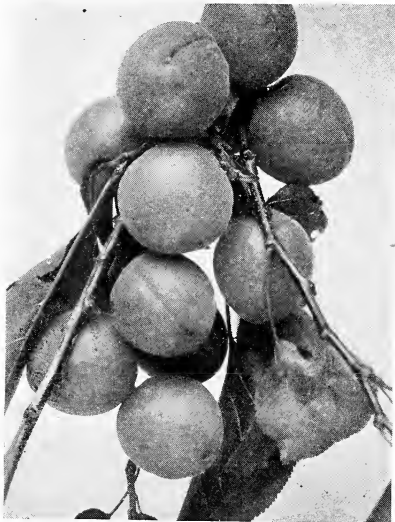

**Early Cluster.** A strong bearer. Fruit medium size, yellow with occasional flecks of red, excellent quality.

**Early Moorpark.** A medium sized, bright colored, sweet, juicy apricot. Ripens about August first.

**Every-year.** Probably a seedling of Montgamet, and seems to be just as good. Hardy and bears regularly at Geneva.

**Montgamet.** Very pleasing, rich, sweet fruit. They bloom very early, and should be covered to protect bloom on frosty nights.

**St. Ambrose.** Very large, and appears to be an unusually early bearer. Almost sure to bloom the second season planted.

Montgamet Apricot

### DWARF NECTARINES

\$1.50 each

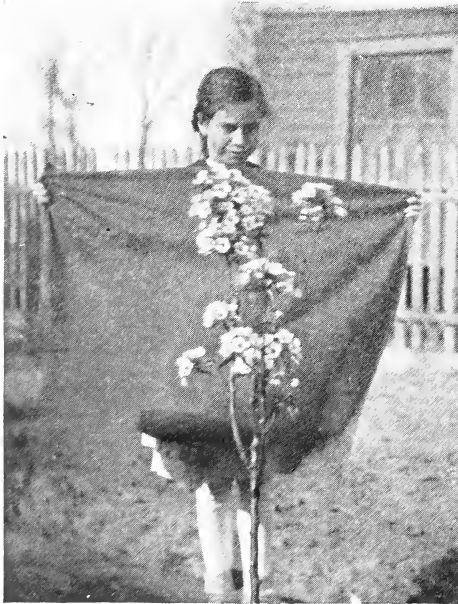

Boston  
Early Violet  
Spencer

Early Newington  
Elruge

Price Each		Below we indicate the color, size, flavor and quality of the varieties offered. In a normal year the entire cherry season for this list of varieties lasts from about June 25th to about July 20th at Geneva. Note that Dwarfs are offered only where a price is indicated opposite the variety.						
Standard	Dwarf	CHERRIES	Color	Size	Flavor	Quality	Season	Remarks
—	\$1.50	Abbesse	Dark Red	Large	Mildly Acid	Very Good	Late	A really fine cherry which is hardy enough for many localities where sweet varieties fail.
\$1.50	1.50	Black Tartarian	Purplish Black	Medium	Sweet	Best	Early	A well known favorite for home planting.
—	1.50	Burbank	Deep Crimson	Very Large	Sweet	Good	Very Early	One of Mr. Luther Burbank's productions. A sure cropper. It is claimed the large leaves protect the fruit from the birds.
1.50	1.50	Early Richmond	Light Red	Medium	Mildly Acid	Very Good	Early	The earliest sour. A good culinary cherry, refreshing to eat when fully ripened.
—	1.50	Governor Wood	Yellowish White Blushed	Medium to Large	Sweet	Very Good	Early	Bears young; beautiful and delicious. Excellent qualities for home use.
1.50	1.50	Montmorency	Rich Red	Medium	Tart	Very Good	Mid-Season	The most popular sour cherry for market, cannery and home use.
1.50	1.50	NAPOLEON (Royal Ann of California)	Bright Red over Yellow	Very Large	Sweet	Very Good	Mid-Season	The leading firm-fleshed sweet cherry. It's size, appearance and quality make it one of the most desirable varieties we grow. The flavor is rich and sweet, which with it's juicy firm flesh, makes a delicious and refreshing fruit.
—	1.50	Rockport	Amber Yellow Blushed	Large	Sweet	Very Good	Early	Richly flavored; too tender to cook; a very fine eating variety.
1.50	1.50	Windsor	Very Dark Red	Medium	Sweet	Very Good	Late Mid-Season	Very firm, almost black when fully ripe, very desirable both for home use and market.
1.50	1.50	Yellow Spanish	Yellow Flushed	Very Large	Sweet	Best	Mid-Season	Very rich and sweet, similar to Napoleon except it is too tender to market easily without injury.

## Dwarf Cherry Trees

### Sweet and Sour

Dwarf Sour Cherry in Bloom  
Planted by Mr. William Otto of New York City.

Cherries, like the other fruits, are dwarfed by propagating on slower growing roots than we use for the standard trees. The sweet varieties may be planted ten to fifteen feet apart, ten feet being amply sufficient where you plan to make the annual dormant pruning severe to aid toward inducing the more dwarf habit of growth. The sour cherries are generally smaller growing and may be planted from eight to twelve feet apart. Cherries do well in almost any soil, except that **it must not be wet**. In the entire eastern part of the United States, except for the apple, probably no fruit does so well as the cherry. In northern New York and the coldest parts of New England the sweet cherries do not stand the severe winter cold, but there are very few localities where the sour cherry can not be grown. Dwarf cherries most naturally grow in the bush form. Sweet varieties are stronger growers than sour, while the sour are inclined to begin fruiting almost right away. Under average conditions the sweets may require three or four years to begin fruiting. Both the sweets and sour are wonderfully beautiful in the spring blooming—fully as ornamental as your spring-flowering shrubs. By selecting say four varieties which ripen in succession you can have cherries for three or four weeks.

The cherry was one of the first fruits planted by our American ancestors, who loved the luxuries of the land.

## PAEONIES

**Couronne D'Or**—Very large blooms, beautiful pure white with yellow center, the central petal delicately flecked with carmine. 75c each.

**Duchesse de Nemours**—Sulphur-white cup-shaped blooms. One of the best late white sorts. The half open bud is particularly beautiful. 75c each.

**Edulis Superba**—Bright mauve-pink. Very free blooming. Early. 75c each.

**Festiva Maxima**—Very large, superb white blooms. Blooms early and is one of the best whites. 60c each.

**Louis Van Houtte**—Very double; a fine dark cherry-red. 60c each.

**Officinalis Rubra**—Rich crimson; large, very early. 75c each.

**Prince Imperial**—A very striking brilliant purplish scarlet. Blooms very profusely. 50c each.

**Riene des Francaise**—White, pink and yellow combined. A fine variety. 50c each.

**Rosea Superba**—Brilliant deep cerise-pink. Compact blooms on long stems. A fine mid-season paeony. 75c each.

## CLIMBING VINES

**American Ivy, (Virginia Creeper), 40c**—Rapid grower. One of best vines for covering walls, trees or verandas. Rich crimson foliage in autumn.

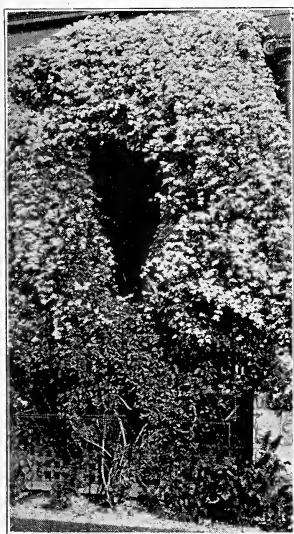

**Ampelopsis Veitchii, (Boston Ivy), 45c**—Clings to stone, brick or cement only; leaves overlap forming a dense green which turns to rich crimson in autumn. Bears clusters of dark blue berries.

**Honeysuckle, Monthly Fragrant, 60c**—Very fragrant red and yellow flowers which bloom all summer.

**Honeysuckle, Hall's Japan, 45c**—Best bloomer of all. Very fragrant, flowers white changing to yellow blooms from July to Sept. Grows well in sun or shade.

**Wisteria, (Chinese Purple), 75c**—Very rapid grower, growing from 15 to 20 feet, in a season. Has foot long flowers of pale violet, blooming in May and June.

**Wisteria, (White Chinese), \$1.00**—Blossoms are a pure white, has the same good qualities as Purple, but a somewhat lighter grower.

Clematis Paniculata

## CLEMATIS

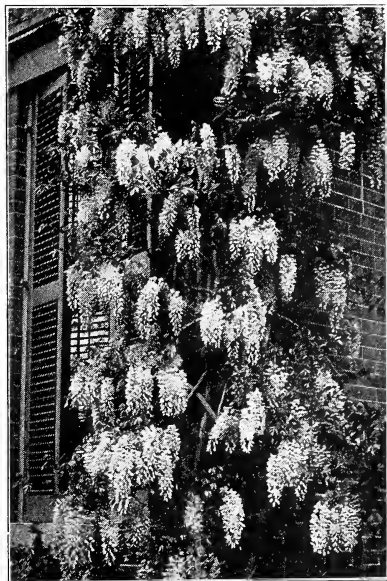

The finest class of flowering climbing vines. The large flowered varieties are light in foliage as compared with their blossoming capacity, and where a screen and flowers are both desired, they are very fine planted with American Ivy and allowed to over run the Ivy. Their large, spreading, starlike blooms are familiar to all.

**Clematis, Henryii, \$1.00**—Best of large flowering white varieties; grows to height of 10 to 12 feet. Fine for trellises, flowers in August.

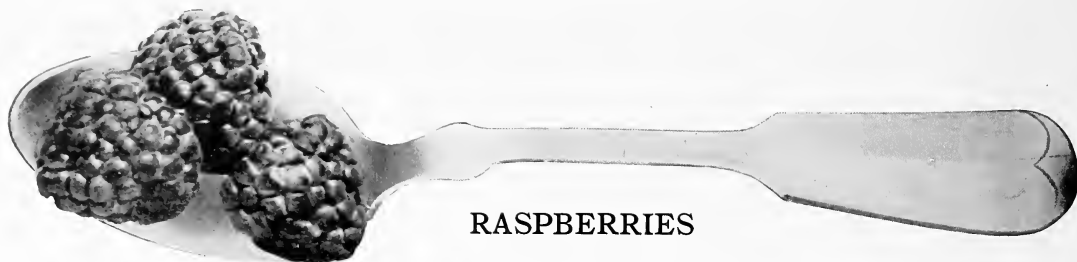

**Clematis, Jackmanii, \$1.00**—This is the best purple variety. Blossoms noted for velvety richness. An abundant and successive bloomer. Blooms July to Sept.

**Clematis, Madam Edward Andre, \$1.00**—Large beautiful, bright velvety red blossoms, free and continuous bloomer. 8 to 10 feet. Blooms from July to September.

**Clematis, Paniculata, 50c**—Hardy, one of the most desirable and useful vines. Has fine foliage, profuse bloomer. White star shaped fragrant flowers. Blooms in September.

Chinese Wisteria Purple

## RASPBERRIES

Per 12	Per 25	Per 50	Per 100	RASPBERRIES	Color	Remarks
\$1.50	\$2.50	\$4.50	\$8.00	Columbian	Purple	Purple berries are apt to be larger than reds and blacks, and this is one of the largest. High flavor, hardy, productive.
1.35	2.25	4.00	7.00	Cuthbert	Red	The berries are large, deep red in color. One of the most widely grown varieties, distinguished by its flavor.
2.50	4.50	8.00	15.00	Erskine Park	Red	The new everbearing raspberry which we believe will fulfill predictions. Produces heavy crops of fine fruit till frost. Perfectly hardy and immensely productive.
1.50	2.50	4.50	8.00	Golden Queen	Yellow	Large; beautiful amber color; firm, sweet and luscious. Very productive, and hardy enough for extreme climates.
1.35	2.25	4.00	7.00	Gregg	Black	One of the old standbys of proved merit. The berry is very attractive and very delicious.
1.50	2.50	4.50	8.00	Herbert	Red	Very sweet and juicy, with a flavor of its own. An extremely heavy producer; hardy in the coldest climates.
2.00	3.50	6.00	10.00	Honey Sweet	Black	Sweet and delicious in flavor; unusually large in size; firm and shining black. A new variety which seems so fine we have added it to our list for the first time.
1.35	2.25	4.00	7.00	Plum Farmer	Black	This has come to be one of the most popular black raspberries in America. The fruit is grayish black, very large, meaty and firm.
1.50	2.50	4.50	8.00	St. Regis	Red	Fruit not so large as Cuthbert, but of very good size, and is produced all summer and fall. It is of excellent flavor.

## BLACKBERRIES

Per 12	Per 25	Per 50	Per 100	BLACK-BERRIES	Remarks
\$1.35	\$2.25	\$4.00	\$7.00	Blowers	Fine flavor, unusually free from seeds, productive, one of the very best.
1.35	2.25	4.00	7.00	El Dorado	Medium size, jet black berries; flavor sweet and rich; very hardy.
1.35	2.25	4.00	7.00	Mersereau	Early season; good size, handsome fruit; juicy, sweet and good quality.
1.45	2.25	4.00	7.00	Snyder	Medium size, sweet and melting; very hardy and enormously productive.
1.35	2.25	4.00	7.00	Taylor	Very large; fine quality, without core; very productive and hardy.

## CURRENTS

Each	Per Doz.	CURRENTS	Remarks
\$ .35	\$3.50	Cherry	One of the largest red currants; very productive.
.45	4.50	Fay's Prolific	A popular red currant, very large and sweet, productive.
.50	5.00	Perfection	Large, bright red berries in large clusters, big crops.
.40	4.00	White Grape	Very large, white, sweet or mildly acid, a fine bearer.

## GOOSEBERRIES

Each	Per Doz.	GOOSE-BERRIES	Color	Remarks
\$ .50	\$5.00	Chataqua	Green	Very large size, very productive, superior quality.
.40	4.00	Downing	Whitish Green	Medium size, soft and juicy, smooth skin, prolific.
.35	3.50	Houghton	Pale red	Small or medium size, sweet, very productive.
.35	3.50	Pearl	Whitish Green	Excellent flavor, prolific, medium size.
.50	5.00	Poorman	Red	A new variety; good; very large.

Perfection Currant

## GRAPE VINES—Listed in Approximate Order of Ripening

### Strong Two Year Old Plants

**Moore's Early, 45c**—Purplish black, hardy, good quality, juicy. Standard early grape of New York.

**Winchell, 90c**—Light green, one of the earliest and best green grapes, hardy, very productive, a good keeper.

**Campbell's Early, 55c**—Dark purplish black, clusters large, good quality, hardy, productive, juicy.

**LUCILE, 55c**—The vine of Lucile is unsurpassed in vigor, health, hardiness and productiveness.

**Worden, 35c**—Glossy black, juicy, very good, large clusters, hardy, productive.

**Brighton, 45c**—Red, large clusters, handsome, vinous flavor, one of the best red grapes.

**Delaware, 45c**—Light red, delicious and handsome fruit, one of the best American table grapes.

**Empire State, 45c**—Pale yellowish green, hardy, very juicy and tender, one of the best green table grapes.

**Moore's Diamond, 35c**—Green. In quality ranks next to Winchell, hardy, productive, a good all round grape.

**Salem, 35c**—Very dark red. A valuable garden grape of high quality, unusually hardy.

**Niagara, 35c**—Green. Clusters large, productive, quality excellent, the leading American table grape.

**Concord, 25c**—Black, hardy, productive, refreshing flavor, a handsome table grape known to all.

**Agawam, 35c**—Dull purplish red, large clusters, rich, sweet, attractive, keeps till mid-winter.

**Catawba, 30c**—Dark purplish red, sweet, rich, high quality, attractive, hardy, productive.

## Rhubarb

**McKay's Mammoth**—A very strong growing, tender, delicious variety. Every garden should have a row of rhubarb. Plant any time, burying the whole plant about three inches from the surface. You almost can't kill them.

20c each

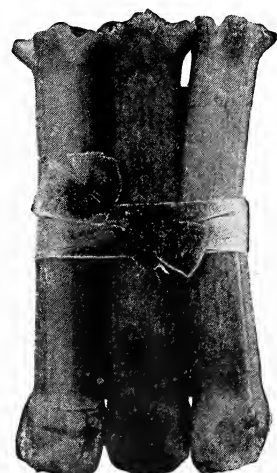

\$2.00 per 12

## Asparagus

**McKay's Giant**—A most delicious variety and a great cropper.

## McKay's Roses—To Grow and Bloom Some New Varieties

At the risk of getting behind the times, we are not apt to take up all the new varieties as they are developed. There are hundreds of roses, with new ones being added every year. After watching the new varieties that have come to us during the last few years, some stand out as so strikingly good that we have added them to our list this year, as they are well worth adding to your rose collection.

### How to Trim Roses

As soon as you receive roses from us, trim them all to within five or six inches from the ground. Each following year, the Hybrid Teas and Perpetuals should be trimmed just about the same as when first planted; because, they bloom from wood which grows the same year, and the rule is **keep them growing and you keep them blooming**. This severe trimming will keep them growing. After their first year, the Climbers and Ramblers should receive more moderate trimming than the others; because, they bloom from last year's wood growth, and if you cut it all away, you get no bloom.

### Ramblers and Climbers

**Climbing American Beauty, 75c**—Same color, size and fragrance as American Beauty, with the addition of the climbing habit. The flowers are produced in great profusion.

**Dorothy Perkins, 60c**—Gives a great profusion of clear shell-pink flowers. Without doubt one of the most beautiful of the ramblers.

**DR. VAN FLEET, 75c**—This rose appeals to everyone because of its dainty color and exquisitely shaped buds and flowers, which are borne on very long stems. The long pointed buds are a rich flesh-pink; in the open flower the outside petals are faintly suffused with pink, the center is a rich shell pink.

**Excelsa, 60c**—This is an improved Crimson Rambler: and is sometimes called the Red Dorothy Perkins. It has a vivid crimson color very similar to Crimson Rambler. What makes this rose particularly desirable, is that the foliage does not become rusty or unsightly later in the season, like the Crimson Rambler. The leaves of Excelsa are glossy and bright all summer long until frost. A splendid Rambler.

**PAUL'S SCARLET CLIMBER, \$1.50**—One of the new climbers which has suddenly become very popular. The bloom is a vivid red shaded with crimson, and makes a brilliant display for a long period of time. The color is a good deal like that of the General Jacqueminot, while the shape and size of flower is similar to Crimson Rambler.

**SILVER MOON, \$1.00**—This is one of the newer climbers, which has a semi-double flower of very large size, the largest being four and one half inches in diameter. The petals are pure white, beautifully cupped, forming a clematis-like flower. The large bunch of yellow stamens in the center adds to its beauty.

**Tausendschon, 75c**—Flowers white or very light pink, changing to various shades of rosy-red. These are produced in trusses, each truss a bouquet in itself.

**White Dorothy Perkins, 60c**—This is as fine as any of the ramblers and has no rival as a white climber. The small blooms are wonderfully dainty.

**Yellow Rambler, 60c**—Bright yellow, changing to canary-yellow; produced in pyramidal clusters.

### Tea, Hybrid Tea and Everblooming Roses

**COLUMBIA, \$1.00**—A very large rose, the wide open flowers often measuring six inches across. The color is true pink, deepening a little as the buds open. All the shades of color deepen as the flowers mature; and do not wash out or lose color, as some roses do.

**DUCHESS OF WELLINGTON, 90c**—This is an intense saffron yellows, streaked with rich crimson. The flowers are fairly full, with large petals, delightfully fragrant and very free blooming.

## McKay's Roses— The Finest Varieties Tea and Hybrid Roses

**Frau Karl Druschki, 75c**—Pure white blooms, very large without being in the least coarse. This is one of the finest white roses.

**GEORGE AHRENDTS, 75c**—This has been called "Pink American Beauty." It is very delicately colored; and is becoming as popular as the old American Beauty, which it resembles in shape.

**Gruss an Teplitz, 80c**—Deep vivid crimson or scarlet, rather different in color from any other rose. One of the brightest colored red roses.

**Kaiserin Augusta Victoria, 75c**—Delicate straw or cream white. The blossoms last well and are fine both in bud and when open. The bushes are unusually hardy and make strong growth.

**Killarney, 90c**—Most delicate flesh pink color. Particularly beautiful in the bud, which is very long and pointed.

**Lady Hillingdon, 80c**—A brilliant deep apricot-yellow. One of the finer and more desirable yellow roses.

**La France, 80c**—Called the Queen of all the roses. The color is a beautiful bright silvery pink with pale lilac shading.

**LOS ANGELES, \$1.50**—This is described as a wonderful combination of flame pink, coral and gold in color. The flowers are large, beautifully shaped and fragrant. The plant is a strong grower and a fine bloomer.

**Mme. Caroline Testout, 75c**—Extra large flowers, of a brilliant, shining pink, with brighter center; full and globular in shape. Very fragrant and extremely free blooming.

**MRS. AARON WARD, 75c**—This is a coppery orange color in the bud, and becomes a lighter golden orange when further developed. Even in full bloom it is a fine yellow rose.

### Hybrid Perpetual and Miscellaneous Roses

**American Beauty, 80c**—Deep pink or crimson. Intensely fragrant and a great favorite known to all.

**Clio, 80c**—Flesh color, deepening in center to rosy-pink. The blooms are large, of fine globular form.

**Coquette des Alps, 75c**—One of the best and most free blooming of the hardy bluish white roses.

**General Jacqueminot, 75c**—Dark shining crimson color, with shapely buds and handsome blooms.

**Marshall P. Wilder, 80c**—Extra large and semi globular in form. The color is a deep, rich, glowing red.

**Mrs. John Laing, 80c**—Soft pink color, beautiful form and very large size. It is exceedingly fragrant.

**Paul Neyron, 80c**—Clear pink color. This is said to be the largest rose in cultivation.

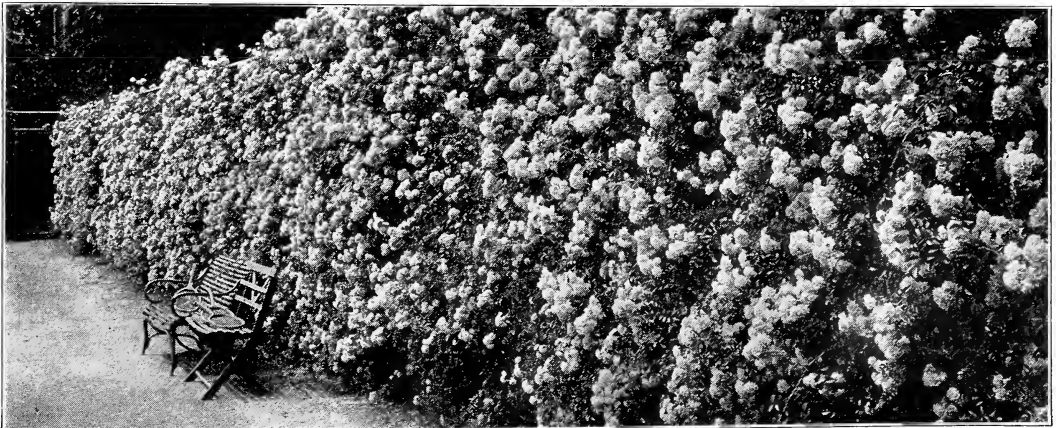

**Prince Camille de Rohan, 75c**—Very dark velvety crimson, almost black. Very double and delightfully sweet.

## Hardy Upright Shrubs

Price Each	HARDY SHRUBS	Height Growth Feet	Season of Bloom	Color of Bloom	Remarks
\$1	Almond, Double Red	5 to 8	May	Rose	Covered with showy, double, rose-like flowers. Good as individual specimen or in shrubbery border.
60c	Althea, Double Purple	8 to 10	Aug. Sept.	Light Purple	The Althea or <b>Rose of Sharon</b> is excellent for shrubbery border. They are thrifty upright growing, remarkably free from insect pests. Particularly valuable since they bloom later than the season of most other shrubs.
60c	Althea, Double Pink	8 to 10	Aug. Sept.	Pink	
60c	Althea, Double White	8 to 10	Aug. Sept.	White	
60c	Barberry, Japan	4 to 6	May	White	Flowers inconspicuous, green summer foliage, brilliant fall colors, bright red winter berries.
\$1.25	Bechtel's Crab	10 to 15	May	Pink	A beautiful tree in bloom; flowers resemble miniature roses; borne profusely; double and fragrant.
45c	Butterfly Bush	4 to 5	July to Frost	Lilac	Long, graceful stems bearing beautiful Lilac colored clusters of miniature flowers. Very hardy and bloom first season.
50c	Deutzia, Crenata Rosea	5 to 6	June	Rose	Tea green foliage, holding color all season. Spikes of sweet scented double flowers.
60c	Deutzia, Gracilis	3 to 4	May June	White	Round and dense in growth. Flowers fragrant, numerous; produced in small racemes on arching branches.
50c	Deutzia, Pride of Rochester	6 to 8	May	Pinkish White	Profuse large double flowers, blooming before other Deutzias.
60c	Forsythia, Suspensa	6 to 8	Apr.	Yellow	Called drooping <b>golden bell</b> . Branches gracefully arching. Very full flowering. The earliest to bloom.
60c	Forsythia Viridissima	6 to 8	April	Yellow	The Upright Golden Bell. Similar to the Suspensa except that the branches are more erect.
60c	Fringe, Purple	10 to 12	July Sept.	Smoke	Known as smoke tree. Its brown thread like bloom covers entire tree, giving smoky appearance.
60c	Honeysuckle Red Tartarian	6 to 8	May	Bright Pink	Attractive, upright growing, with abundance of fragrant flowers in spring and red fruit in autumn.
75c	Hydrangea, P. G. Bush Form	6 to 8	July Sept.	White	Immense white blooms, changing to pink, later to bronze. Prune each Spring to keep low and bushy.
75c	Hydrangea, Hills of Snow	6	July Sept.	White	Blooms are similar to the familiar snowball, but are larger; conspicuously white and imposing.

Snowball

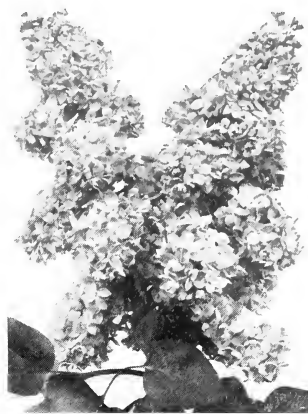

Syringa

Purple Fringe

Bloom of Weigela Eva Rathke

Lilac

Price Each	SHRUBS	Height Growth Feet	Season of Bloom	Color	Remarks
65c	Lilac, Common White or Purple	8 to 10	May	White or Purple	Known to all. Prune well after each blooming, if it is desired to keep them bushy.
75c	Snowball, Common	6 to 8	May June	White	Dense and spreading in growth, very decorative while in bloom. Flowers in great profusion.
50c	Spirea, Aurea	6 to 8	June	White	An interesting variety, with golden yellow tinted foliage. Double white flowers in June.
50c	Spirea, Anthony Waterer	2 to 3	July Aug.	Bright Crimson	Dwarf growing, compact, with good dense foliage. Will bloom until Fall if flowers are cut as they fade.
60c	Spirea Billardii	5 to 6	July Aug.	Bright Pink	Upright habit of growth. Dense spikes of flowers about six inches long. Blooms nearly all summer.
55c	Spirea, Callosa Alba	2 to 3	June Sept.	White	Upright in growth, dull green leaves, flat clusters of flowers produced on erect branches.
50c	Spirea, Callosa Rosea	3 to 4	June to Sept.	Red	Deep rose-red flowers in close clusters, lasting nearly all summer.
50c	Spirea, Van Houtte	6 to 8	May June	White	Flowers in flat clusters on arching branches. A handsome and useful shrub, the best of the Spireas.
75c	Syringa, Golden	4 to 6	May June	White	A compact shrub with very brilliant yellow foliage. Good for contrast with dark leaved shrubs.
60c	Weigela, Candida	6 to 8	June Aug.	White	Bushy in growth. Flowers large and quite showy. Will bloom all summer.
75c	Weigela, Eva Rathke	5 to 6	June July	Crimson	The hardiest of the Weigelas; free blooming; flowers very handsome and fragrant.
60c	Weigela, Variegated	5 to 6	June	Rose	Dense in growth. Leaves variegated with white and yellow. A handsome shrub for foliage effect.
